ABOUT ME

Software engineer with 2 years experience in developing robust code and willing to learn attitude. I'm a person who believe that hard work and effort can achieve the goal set.

My job specialized in both front-end and back-end development. I'm passionate about programming since my first approach to code during university time. I felt great when I'm able to solve the real world problem and ease others life with the technology I developed.

And I really enjoy and feel grateful every time work in a team and tackle the problem together.
